

Datasheet for

Bencon All-stone and Facade cleaner

Description:

Bencon All-Stone and Facade cleaner is an efficient agent for cleaning of pavements on walls, wood, tiles and similar.

Usage:

Bencon All-Stone and Facade cleaner can be used on all types of wood, tiles, walls, facades and roofs.

Bencon All-Stone and Facade cleaner should be diluted before use, up to a 1:5 solution, which is applied with a handheld sprayer.

The surface must be dry before the product is applied.

If the subject is stained by dirt, it is recommended to use a 1:2 solution. Retreatment is recommended 1-2 times a year. By doing so a clean and smooth surface is achieved.

The product must be used at a minimum of +5°C – and the surface has to be clear of ice and snow residue. The treated surfaces can be processed afterwards. 8 to 14 days after the treatment, can the previously dirty areas be washed with water or cleaned with a brush.

Storage:

Is stored free of frost and in sealed packaging.

Dosage:

Should be diluted prior to use, up to 1:5 solution, which is applied with a handheld sprayer.

Physical properties:

Bencon All-Stone and Facade cleaner is a cleaning agent consisting of cationic surfactants: quaternary ammonium compounds, additives and water.

Avoid to spray on plants or grass, potentially cover off.
